

C.E.D.

OBJECTIVE: A learning and creative activity concept designed to support repeated use, reduce waste, and enhance engagement for users of all ages. It could provide a more efficient and sustainable alternative to traditional single-use activity materials.

**REUSABLE DRY
ERASE BOARD**

**CNC/LASER-CUT
DESIGNS**

**DRY ERASE
MARKERS**

**BOARD COULD BE
REUSED MULTIPLE TIMES**

NOTE: This information is being forwarded on a confidential basis with the understanding that it will not be used or disclosed without written permission.

INSPIRATION FOR THE INVENTION:

"I wanted to create something that would allow kids to enjoy coloring and learning without constantly needing new materials. This idea could provide a fun, reusable way to be creative while also saving time and money."

BENEFITS:

- Reduces the need for disposable materials and lower ongoing costs
- Provides a more engaging and interactive learning experience
- Encourages creativity and experimentation without fear of mistakes

FEATURES:

- The C.E.D. (Custom Erasable Design) could consist of a reusable dry erase board and can be utilized on single or double sided dry erase materials
- Board could be made using CNC or laser-cutting processes on double-sided dry erase material to allow repeated use on both surfaces, as well as just single-sided if desired
- Surface could feature custom images, letters, or designs etched or printed onto the board to allow repeated coloring and erasing without degradation
- May be produced in various shapes and configurations depending on user preference or educational needs
- Materials would include durable dry erase board substrate with smooth coating to support frequent writing and erasing cycles
- To use the invention, a user may color directly onto the surface using dry erase markers, allowing creative interaction with the displayed image

- The user could then erase the markings easily using a cloth or eraser, restoring the surface for repeated use
- Board could be reused multiple times to practice coloring, writing, or drawing
- Invention could be utilized by children or adults for learning activities, creative expression, or educational exercises in a mess-free manner

DEVELOPMENT:

- Patent application in process

MARKETING OUTLETS

- Educational supply stores
- Arts and crafts retailers
- Online
- School supply catalogs and distributors
